5 | Promotion of Access to Information Act, 2002

The Promotion of Access to Information Act (PAIA)

The PAIA was passed to give effect to the constitutional right, held by everyone in South Africa, of access to information which is held by the State or by another person and which is required for the exercise or protection of any right. Where a request is made in terms of PAIA, the body to which the request is made, is obliged to give access to the requested information, except where the Act expressly provides that the information may or must not be released. It is important to note that PAIA recognises certain limitations to the right of access to information, including, but not exclusively, limitations aimed at the reasonable protection of privacy, commercial confidentiality, and effective, efficient and good governance, and in a manner which balances that right with any other rights, including such rights contained in the Bill of Rights in the Constitution. The Protection of Personal Information Act (POPIA) was enacted in November 2013, to promote the protection of

personal information processed by public and private bodies. POPIA amended certain provisions of PAIA, balancing the need for access to information against the need to ensure the protection of personal information.

We will take all reasonable steps to confirm your identity before providing details of your personal information in respect of a formal request for such information. We are entitled to charge a fee for this service and will let you know what it is at the time of your request.
